

## PROJECT ABSTRACT

### **VCare**

A system for managing salon. This system keeps track of customer, employee, and stock data along with the payment for services. This is a fully equipped system that alone manages the entire function of salon.

The system works as follows:

#### Admin

- Administrator may login to the system
- Manage employee and customer details
- View and edit leave status of the employee
- view tracks of inventory coming in
- view various customers and provide offers, discounts
- view billings and payments

#### Employee

- Employee can login
- Update his/her account
- View customer and various packages used by them
- Manage counters for customers
- Handle online payment as well as manual

#### Customer

- View new packages and new arrivals of products
- Buy products and book counters , cancel requests
- Online payment
- Rate employee services
- Profile management
